

NSPECT™

Validate
the clean

NSPECT™ makes the invisible, visible and validates the clean.

Re-open with a level of confidence that only comes from certainty. NSPECT™ can measure your level of cleanliness and show you - really show you - how to meet and keep the standards of clean you demand.

- Get more than just a clean look, be confident about cleanliness with regular testing of surface contaminant levels.
- Luminometers are commonly used throughout various industries, including healthcare and food service, to test and monitor the cleanliness of surfaces not visible to the naked eye.
- At PURTEQ® we have partnered with Hygiena®, a world-leading manufacturer of Luminometer testing equipment.
- NSPECT™ provides a historical record of testing results which can be used to modify cleaning regimens and meet specific cleaning objectives.

Measure how clean your environment actually is. Get NSPECT™.
